Skills

Programming: C++, JavaScript, TypeScript, HTML, CSS, SQL ,MongoDB, ExpressJS, ReactJS, REST APIs, NodeJS, Mongoose, Tailwind and Bootstrap.

Technology / Tools: Visual Studio, GitHub, Postman, Render.

Soft Skills: Time Management, Analytical Skills, Effective Communication, Teamwork, and Problem-solving.

 Interests: Cricket, web3, and Video Games.

Projects

Movie-Loom (*Full Stack)* | **Live** | **Github**

- A full-stack movie discovery platform built with the **MERN** stack. Users can **browse**, **search**, and view information about movies, including details like ratings, genres, and release dates. The application features a **responsive** and user-friendly interface built with **React.js**, while the backend is powered by **Node.js** and **Express.js** for seamless API integration. The project integrates with external movie data sources, delivering real-time information. The app is **deployed on Render,** ensuring fast and reliable performance.

OrderLit (ecommerce) | (*Backend*) | **Github**

- **MongoDB:** To store product details, user information, orders, and more.
- **Express.js**: Used for routing and handling backend logic.
- **Node.js**: Powers the server, managing API endpoints and connecting to the database.
- **API Design**: RESTful APIs were likely created for operations such as user authentication, product retrieval, and order management.

Features:

- User Authentication (JWT & Local storage).
- Product listing and search.
- Order creation and management.

Medium.com (blog web app) | (*Backend*) | **Github**

Developed a backend system for a Medium-like platform, enabling users to create, update, and manage articles.This backend enables functionalities such as user login, creating and editing posts, and interacting with content dynamically**MongoDB**: Database for storing user profiles, blog posts, comments, and other metadata.**Express.js**: Framework for handling routes and middleware.**Node.js**: Backend server to process requests and integrate APIs.

- **Authentication:** Secure user login and registration, possibly using JWT authentication.
- **User Profiles:** Allows users to manage their profiles, including displaying their published blogs.
- **Blog Management**: Create, edit, and delete blog posts.

Education

Yashwantrao chavan institute of science, satara Aug 2021 - May 2024 Bachelor of Science (*CGPA: 9.3/10*)

Self Learning: Database Management System, Complexity analysis, Version Control Systems, Operating Systems, Computer Networks.

Certification

- • Developed Front-End Apps with React
- • Learn C++ Programming || Python Programming
- • Introduction to Web Development with HTML, CSS, JavaScript
